Preface vii

Conference Organization ix

Supporting Organizations and Sponsors x

LASER ABLATION

Process Characterization

Analysis and experimental study of one-photon incubated absorption in polymers
P.E. Dyer, D.M. Karnakis and G.A. Oldershaw 1

Overheated metastable states in polymer sublimation by laser radiation
V.I. Mazhukin, I. Smurov, C. Surry and G. Flamant 7

The laser ablation threshold of $YBa_2Cu_3O_{6+x}$ as revealed by using projection optics
B. Dam, J. Rector, M.F. Chang, S. Kars, D.G. de Groot and R. Griessen 13

Blast-wave studies of excimer laser ablation of ZnS
P.E. Dyer, P.H. Key, D. Sands, H.V. Snelling and F.X. Wagner 18

Pulsed laser ablation of copper
R. Jordan, D. Cole, J.G. Lunney, K. Mackay and D. Givord 24

Why are high-T_c superconductors, HTSC, deposited by 248 nm lasers at 400 MW/cm^2?
R.W. Dreyfus 29

Time of flight mass spectrometry and covariance mapping technique investigation of charged specie evolution in $Pb(Ti_{0.48}Zr_{0.52})O_3$ laser ablation
S. Amoruso, V. Berardi, N. Spinelli, R. Velotta, M. Armenante, F. Fuso, M. Allegrini and E. Arimondo 35

Plasma properties and stoichiometry of laser-deposited BiSrCaCuO thin films
J. Gonzalo, C.N. Afonso, F. Vega, D. Martínez García and J. Perrière 40

Laser ablation of BiSrCaCuO superconducting thin film: analysis of intermediate species in real time
U. Gambardella, A. Giardini, V. Marotta, A. Morone, S. Orlando and M. Snels 45

Characterisation of ionic species generated during ablation of $Bi_2Sr_2Ca_2Cu_3O_{10}$ by frequency-doubled Nd:YAG laser irradiation
G.C. Tyrrell, T.H. York and I.W. Boyd 50

Laser wavelength dependence of $YBa_2Cu_3O_y$ laser ablation plumes
J. Palau, M. Sowinska, M. Varela, P. Summ, J. Esteve, P. Serra, J.L. Morenza and J.A. Miehé 59

Study of PbTe(Ga) evaporation using a nanosecond pulsed laser
V.A. Mikhailov, F.N. Putilin and D.N. Trubnikov 64

Composition and gas dynamics of laser ablated AlN plumes
T.M. Di Palma, S. Orlando, A. Giardini-Guidoni, A.J. Paul, J.W. Hastie and A. Mele 68

Laser ablation of refractory material, cluster formation and deposition
H. Yu, M.G. Huber and F.W. Froben 74

Pulsed laser deposition of metal and metal multilayer films
J.G. Lunney 79

Thin Film Deposition and Characterization

Laser deposition of metallic alloys and multilayers
H.-U. Krebs, S. Fähler and O. Bremert 86

Comparison of the structure of laser deposited and sputtered metallic alloys
H.-U. Krebs, O. Bremert, M. Störmer and Y. Luo 90

Erbium oxide thin films on Si(100) obtained by laser ablation and electron beam evaporation
X. Queralt, C. Ferrater, F. Sánchez, R. Aguiar, J. Palau and M. Varela 95

Effects of laser wavelength and fluence on the growth of ZnO thin films by pulsed laser deposition
V. Craciun, S. Amirhaghi, D. Craciun, J. Elders, J.G.E. Gardeniers and I.W. Boyd 99

Influence of ion bombardment on the refractive index of laser pulse deposited oxide films
G. Reisse, S. Weissmantel, B. Keiper, B. Steiger, H. Johansen, T. Martini and R. Scholz 107

Influence of LN_2 substrate cooling on optical properties of laser-pulse-deposited oxide films
G. Reisse, S. Weissmantel, B. Keiper, B. Steiger, H. Johansen, T. Martini and R. Scholz 114

Excimer laser sputtering deposition of TiO_2 optical coating for solar cells
H.-A. Durand, J.-H. Brimaud, O. Hellman, H. Shibata, S. Sakuragi, Y. Makita, D. Gesbert and P. Meyrueis 122

SiO_2 film deposition by XeCl laser ablation of fused silica
P. Baeri, R. Reitano and N. Marino 128

SEM observations of YBCO on as-received and heat-treated MgO substrates
S. King, L. Coccia and I.W. Boyd 134

Pulsed laser deposition and nanometer scale characterization of $YBa_2Cu_3O_{7-\delta}$ thin films by scanning probe methods
R. Sum, H.P. Lang and H.-J. Güntherodt 140

Structural properties of $LiNbO_3$ thin films grown by the pulsed laser deposition technique
P. Aubert, G. Garry, R. Bisaro and J. Garcia Lopez 144

Pulsed laser deposition of epitaxial layers of ZnSe
J.L. Deiss, A. Chergui, L. Koutti, J.L. Loison, M. Robino and J.B. Grun 149

Comparison of epitaxial films of $Zn_{1-x}Mn_xTe$ on (111) and (100) GaAs produced by pulsed laser deposition
H.J. Masterson and J.G. Lunney 154

Pulsed laser deposition of $NbTe_x$ thin films
F. Grangeon, H. Sassoli, Y. Mathey, M. Autric, D. Pailharey and W. Marine 160

Structure and chemical composition of BN thin films grown by pulsed-laser deposition (PLD)
T. Klotzbücher, W. Pfleging, M. Mertin, D.A. Wesner and E.W. Kreutz 165

Excimer laser reactive ablation deposition of silicon nitride films
E. D'Anna, G. Leggieri, A. Luches, M. Martino, A. Perrone, G. Majni, P. Mengucci, R. Alexandrescu, I.N. Mihailescu and J. Zemek 170

$Si_{1-x}Ge_x$ thin films deposited by the pulsed excimer laser ablation technique
F. Antoni, E. Fogarassy, C. Fuchs, B. Prévot and J.P. Stoquert 175

Effect of laser power density and deposition temperature on electrical and optical properties of pulsed laser ablated diamond-like carbon films
J. Levoska and S. Leppävuori 180

In-situ spectroscopic ellipsometry to control the growth of Ti nitride and carbide thin films
S. Logothetidis, I. Alexandrou and J. Stoemenos 185

Pulsed-laser deposition and characterization of TaC films
R. Teghil, L. D'Alessio, G. De Maria and D. Ferro 190

Techniques and Applications

Metal pattern deposition by laser-induced forward transfer
Z. Kántor, Z. Tóth and T. Szörényi 196

New approach of a laser-induced forward transfer for deposition of patterned thin metal films
H. Esrom, J.-Y. Zhang, U. Kogelschatz and A.J. Pedraza 202

Laser-induced forward transfer of ultra-fine diamond particles for selective deposition of diamond films
S.M. Pimenov, G.A. Shafeev, A.A. Smolin, V.I. Konov and B.K. Vodolaga 208

Optodynamic aspect of a pulsed laser ablation process
R. Hrovatin and J. Možina 213

Atypical characteristics of KrF excimer laser ablation of indium–tin oxide films
T. Szörényi, Z. Kántor and L.D. Laude 219

Excimer laser ablation of Nd:YAG and Nd:glass
S.R. Jackson, W.J. Metheringham and P.E. Dyer 223

Excimer laser ablation patterning of dielectric layers
J. Ihlemann and B. Wolff-Rottke 228

Excimer laser etching of diamond-like carbon films: spalling effect
T.V. Kononenko, V.G. Ralchenko, E.D. Obraztsova, V.I. Konov, J. Seth, S.V. Babu and E.N. Loubnin 234

Ablation of nylon-6,6 with UV and IR lasers
C.D. Skordoulis, M. Makropoulou and A.A. Serafetinides 239

Structuring of polyimide–metal carbide layer systems by excimer laser ablation
J. Ihlemann, B. Wolff-Rottke, G. Danev, K. Petkov and E. Spassova 245

Combination of excimer laser micromachining and replication processes suited for large scale production
J. Arnold, U. Dasbach, W. Ehrfeld, K. Hesch and H. Löwe 251

Laser–surface processing of metals and ceramics for industrial applications
H.W. Bergmann, K. Schutte, E. Schubert and A. Emmel 259

Tailoring of surface properties by removal and deposition with laser radiation
E.W. Kreutz, H. Frerichs, M. Mertin, D.A. Wesner and W. Pfleging 266

PHOTON-INDUCED SURFACE MODIFICATION

Using Lamps

UV photo-annealing of thin sol–gel films
R.E. Van de Leest 278

Tunable UV-flash krypton lamp array useful for large area deposition and in situ UV annealing of Si-based dielectrics
J. Flicstein, Y. Vitel, O. Dulac, C. Debauche, Y.I. Nissim and C. Licoppe 286

Improvement of silicon oxide film properties by ultraviolet excimer lamp annealing
E.G. Parada, P. González, J. Serra, B. León, M. Pérez-Amor, J. Flicstein and R.A.B. Devine 294

Effect of UV annealing of radiation damage in SiO_2 films
I.P. Lisovskii, V.G. Litovchenko and V.B. Lozinskii 299

Using Lasers

Influence of temperature gradient to solidification velocity ratio on the structure transformation in pulsed- and CW-laser surface treatment
N.A. Berjeza, S.P. Velikevitch, V.I. Mazhukin, I. Smurov and G. Flamant 303

Rapid prototyping with CO_2 laser radiation
E.W. Kreutz, G. Backes, A. Gasser and K. Wissenbach 310

Microstructure, chemical composition and properties of the surface layer of M2 steel after laser melting under different conditions
J. Kusiński 317

Thermodynamics and kinetics of solidification of Si–As solutions
R. Reitano 323

Diffusion and reactions in thin films
Â.L. Greer 329

Morphology of $Si_{1-x}Ge_x$ thin crystalline films obtained by pulsed-excimer-laser annealing of heavily Ge-implanted Si
E.L. Mathé, A. Naudon, F. Repplinger and E. Fogarassy 338

Formation of poly-$Si_{1-x}Ge_x$ using excimer-laser processing
A. Slaoui, C. Deng, S. Talwar, K.J. Kramer, T.W. Sigmon, J.P. Stoquert and B. Prevot 346

Surface morphology and structure modification of silicon layers induced by nanosecond laser radiation
A.V. Demchuk and V.A. Labunov 353

Theoretical and experimental studies of a-Si:H recrystallization by XeCl excimer laser irradiation
R. Černý, V. Vydra, P. Přikryl, I. Ulrych, J. Kočka, K.M.A. El-Kader, Z. Chvoj and V. Cháb 359

Photo-luminescence of pulsed excimer laser annealed Sb-implanted CdTe
F.X. Wagner, K. Dhese, P.H. Key, D. Sands, S.R. Jackson, R. Kirbitson and J.E. Nicholls 364

Surface properties of excimer-laser-irradiated sintered alumina
L.D. Laude, K. Kolev, M. Brunel and P. Deleter 368

Formation of Ti^{3+} ions at the surface of laser-irradiated rutile
T. Le Mercier, J.-M. Mariot, P. Parent, M.-F. Fontaine, C.F. Hague and M. Quarton 382

Enhanced adherence of electroless metal deposit on SiO_2 via control of the chemical environment of the Pd seeding layer
G.A. Shafeev, L. Bellard, J.-M. Themlin, W. Marine and A. Cros 387

Laser-assisted selective metallisation of diamonds by electroless Ni and Cu plating
G.A. Shafeev, S.M. Pimenov and E.N. Loubnin 392

Laser-induced formation of porous silicon
V. Baranauskas, G.P. Thim and A. Peled 398

Laser-induced surface modification and metallization of polymers
H. Frerichs, J. Stricker, D.A. Wesner and E.W. Kreutz 405

Thin films of polymer blends: surface treatment and theoretical modeling
P. Viville, O. Thoelen, S. Beauvois, R. Lazzaroni, G. Lambin, J.L. Brédas, K. Kolev and L. Laude 411

Electrochemical and photoelectrochemical modification and characterisation of thin passive films
O. Blum and U. König 417

Laser-assisted etching-like damage of Si
A.V. Simakin and G.A. Shafeev 422

PHOTO-CHEMICAL DEPOSITION

Using Lamps

UV light irradiation effects on nucleation during chemical vapor deposition of Al films
M. Hanabusa and A. Komatsu 428

Photoassisted growth of II–VI semiconductor films
Sz. Fujita and Sg. Fujita 431

Photoassisted metalorganic vapor-phase epitaxy of ZnSe on GaAs
J.E. Bourée, R. Helbing, W. Kuhn and O. Gorochov 437

Photo-assisted growth and characterization of $Zn_xCd_{1-x}S$ by MOVPE
H. Dumont, Sz. Fujita and Sg. Fujita 442

GaAs growth by photon-assisted metalorganic molecular beam epitaxy using ethyl derivatives of gallium and arsenic
F. Maury, K. Bouabid, N. Fazouan, A.M. Gué and D. Estève 447

Interrupted cycle chemical beam epitaxy of gallium phosphide on silicon with or without photon assistance
J.T. Kelliher, A.E. Miller, N. Dietz, S. Habermehl, Y.L. Chen, Z. Lu, G. Lucovsky and K.J. Bachmann 453

Using Lasers

Laser direct writing and instabilities: a one-dimensional approach
N. Arnold, P.B. Kargl and D. Bäuerle 457

Laser chemical vapour deposition for microelectronics
G. Auvert 466

Laser processing of tungsten from WF_6 and SiH_4
M. Meunier, P. Desjardins, M. Tabbal, N. Elyaagoubi, R. Izquierdo and A. Yelon 475

Laser-induced etching and deposition of tungsten in WF_6–H_2 atmosphere
K. Piglmayer, Z. Tóth and Z. Kantor 484

Kinetics of laser thermal decomposition of trimethylamine alane
D. Tonneau, J.E. Bourée and Y. Pauleau 488

Kinetic model for scanning laser-induced deposition from the liquid phase
Zs. Geretovszky, L. Kelemen, K. Bali and T. Szörényi 494

The effect of process parameters on the O/Mo ratio in laser deposition of molybdenum oxides from aqueous solutions
K. Bali, Zs. Geretovszky, A.L. Tóth and T. Szörényi 500

Deposition of gold on polyimide from solutions
S. Pflüger, M. Wehner, F. Jansen, Th. Kruck and F. Lupp 504

Excimer laser-induced deposition of copper from Cu(hfac)(TMVS)
R. Izquierdo, J. Bertomeu, M. Suys, E. Sacher and M. Meunier 509

Laser induced deposition of nanocrystalline Si with preferred crystallographic orientation
S. Tamir and S. Berger 514

VUV laser (157 nm) chemical vapor deposition of high quality amorphous hydrogenated silicon: gas phase chemistry and modelling
H. Karstens, J. Knobloch, A. Winkler, A. Pusel, M. Barth and P. Hess 521

Germanium-containing coatings by IR laser-induced decomposition of ethoxy(trimethyl)germane and tetramethylgermane
R. Fajgar, M. Jakoubková, Z. Bastl and J. Pola 530

Aggregation kinetics of photo-excited colloid solutions observed by dynamic photon correlation spectroscopy (PCS)
N. Borochov and A. Peled 533

Laser-induced photodeposition from ZnS colloid solutions
A. Peled, B. Dragnea, R. Alexandrescu and A. Andrei 538

LASER-CHEMICAL ETCHING

Laser chemical etching of Cu_2O
G. Stenberg, M. Boman, M. Ottosson and J.-O. Carlsson 543

Laser-assisted dry etching ablation of InP
J.J. Dubowski, A. Compaan and M. Prasad 548

Surface reaction control in digital etching of GaAs by using a tunable UV laser system: reaction control mechanism in layer-by-layer etching
M. Ishii, T. Meguro, T. Sugano, K. Gamo and Y. Aoyagi 554

Excimer laser-assisted etching of silicon in chlorine: adsorption and desorption
A.V. Kuzmichov 559

Excimer-laser-induced etching of silicon in chlorine atmosphere at a wavelength of 248 nm
W. Jiang, H. Baumgärtner and I. Eisele 564

Three-dimensional nanostructures by direct laser etching of Si
M. Müllenborn, H. Dirac and J.W. Petersen 568

Desorption in light-induced dry etching of GaAs with Cl_2 around 120 nm
B. Li, U. Streller, H.-P. Krause, I. Twesten, N. Schwentner, V. Stepanenko and Yu. Poltoratskii 577

LASER-BASED THIN FILM DIAGNOSTICS

In-situ laser reflectometry of the epitaxial growth of thin semiconductor films
T. Farrell and J.V. Armstrong 582

Laser diagnostics of C_{60} and C_{70} films by broadband surface acoustic wave spectroscopy
A.A. Kolomenskii, M. Szabadi and P. Hess 591

16 MB DRAM trench depth characterization using dome scatterometry
Z.R. Hatab, S.L. Prins, S.S.H. Naqvi and J.R. McNeil 597

P-doped polycrystalline silicon films obtained at low temperature by hot-wire chemical vapor deposition
J. Puigdollers, J. Cifre, M.C. Polo, J.M. Asensi, J. Bertomeu, J. Andreu and A. Lloret 600

Author index 604

Subject index 611
